

YAHYA SHOAIB

Sr. React Native Developer | MERN Stack Engineer

+92-304-008-5246 | yahyashoaib112@gmail.com | Lahore, Pakistan | Portfolio: tinyurl.com/YahyaShoaib

PROFESSIONAL SUMMARY

Senior React Native Developer with 4+ years of experience building and shipping production-grade Android and iOS applications. Led mobile engineering teams, drove architecture decisions, and consistently improved app performance and code quality across multiple product cycles. Proficient in JavaScript, TypeScript, Redux, and the full React Native ecosystem, with growing full-stack capability in Node.js, React.js, and the MERN stack. Solid integration experience across Firebase, Stripe, and Socket.IO. Known for writing clean, scalable code, mentoring junior developers, and collaborating closely with product and design teams to deliver apps users actually enjoy.

WORK EXPERIENCE

Sr. React Native Developer | Wateen Telecom Limited

Apr 2026 – Present

- Contributing to mobile and web development within a large-scale enterprise telecom environment, building features across Android and iOS.
- Expanding into full-stack development using Node.js and React.js, bridging mobile and backend workstreams as part of a broader MERN stack transition.
- Applying React Native best practices — reusable components, clean architecture, and performance-first development — to deliver maintainable production code.
- Collaborating with cross-functional teams to align technical delivery with product requirements and business objectives.

Sr. React Native Developer — Team Lead | TX Dynamics

May 2025 – Apr 2026

- Led a team of React Native developers, overseeing architecture design, code reviews, and feature delivery across Android and iOS platforms.
- Established coding standards and reusable component libraries that reduced feature development time and improved consistency across the codebase.
- Diagnosed and resolved critical production issues, reducing app crash rates and improving overall stability for end users.
- Collaborated directly with product managers and stakeholders to translate business requirements into scalable, maintainable technical solutions.
- Mentored junior developers through pair programming, structured feedback, and architecture walkthroughs, raising the overall quality bar of the team.

Sr. React Native Developer | Viral Square

Aug 2024 – Apr 2025

- Spearheaded performance optimization efforts, identifying and resolving UI bottlenecks that improved app responsiveness and reduced render times.
- Built and shipped new product features end-to-end across Android and iOS, coordinating with QA for smooth, stable releases.
- Integrated third-party services including Firebase (analytics, push notifications) and Stripe (payment flows), improving retention and monetization.
- Refactored legacy components using TypeScript and modular patterns, reducing technical debt and improving long-term maintainability.

React Native Developer | Semantic Solutions

Apr 2022 – Jul 2024

- Contributed to multiple production React Native projects from initial development through deployment on both platforms.
- Debugged complex UI and logic issues across Android and iOS, reducing reported bug count and improving overall user experience.
- Implemented reusable components and screen flows using modular architecture patterns, speeding up development across concurrent projects.
- Collaborated with senior engineers through structured code reviews, adopting mobile best practices in a fast-paced product environment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Mobile: React Native CLI, Expo, Android Studio, Xcode

Frontend: React.js, Redux, Redux Toolkit

Backend: Node.js, REST APIs, Express.js (learning)

Stack: MERN (MongoDB, Express, React, Node) — in progress

Services & Integrations: Firebase (Auth, Firestore, FCM), Stripe, Socket.IO, In-app subscriptions

Tools: Git, GitHub, NVM, Yarn, VS Code

PROJECTS

Full portfolio: tinyurl.com/YahyaShoaib

UniHub & UniHub Services — *React Native CLI, TypeScript, Socket.IO*

Dual-app ecosystem for university students and service providers — real-time messaging, booking flows, and role-based navigation architecture.

MyVisits — *React Native, RTK Query, Firebase*

Telehealth and doctor home visit appointment application with real-time API integration using RTK Query. Built scalable patient booking flows, appointment management, and smooth cross-platform user experience with optimized performance.

Cabz — *React Native CLI, TypeScript*

Ride-hailing mobile application with scalable architecture, clean navigation flow, and reusable components. Developed using React Native CLI and TypeScript with focus on performance, maintainability, and seamless user experience.

EDUCATION

Bachelor of Science in Computer Science

2016 – 2018

Khawaja Fareed College, Lahore

LANGUAGES

English (Professional working proficiency) **Urdu** (Native)
